

# Rave Collaborate

## Digitize and automate standard operating procedures

In those initial, critical moments of an incident, you have to be ready. Your teams need to make strategic decisions quickly for any number of possible events, before and after first responders arrive on scene. When life-saving decisions must be made, do you want the added challenge of finding the right paper-based checklist in a binder?

Rave Collaborate is a tactical incident collaboration solution for both planned and unplanned events, providing task checklists, situation-specific resources, and real-time reporting. When something imagined or unimaginable occurs, these tools help your staff quickly see what needs to be done, respond appropriately and account for actions taken.

### → Enhance awareness

Automate the communication of real-time updates to everyone who needs to be notified. Give stakeholders insight into the progress of the situation and provide access to key details like location and who is involved.

### → Coordinate response

Reduce risk with interactive step-by-step instructions to reinforce policies and procedures. The dashboard helps you quickly gauge which tasks remain as the event unfolds.

### → Track compliance

Provide a detailed timeline and record all necessary actions taken during routine situations or unexpected emergencies. Show proof of preventative measures required for laws, regulations, or organizational commitments.

# Key features

## Reinforce policies and procedures

Turn static, paper-based standard operating procedures into automated, actionable workflows. The dashboard clearly defines tasks to speed response and reminders and comprehensive reporting encourage compliance with best practices.

## Plan your best response

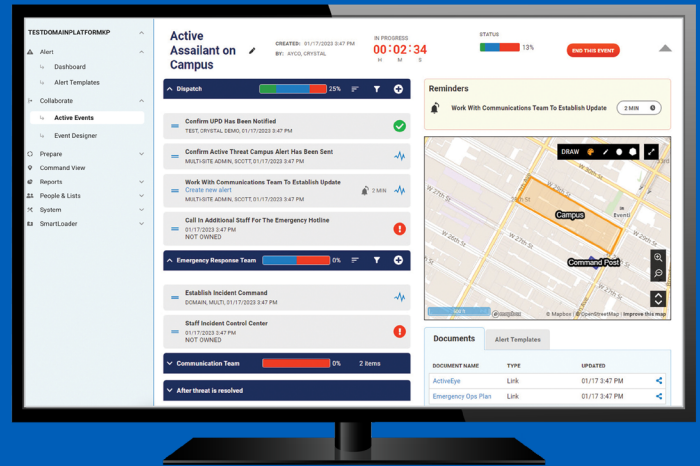

Prebuilt event templates in Collaborate help agencies prepare for all types of scenarios. Include helpful, specific resources like procedure documents, photos, contact information, access codes and more.

## Dynamically manage tasks

View and interact with critical tasks through an intuitive online dashboard. "Assign" ownership of roles, provide real-time updates, and react quickly during an active event.

## Integrate critical communications

Help your teams communicate effectively during an event. Use Collaborate to manage your communications plans and connect with Rave Alert (or other notification technologies) to issue those communications and keep teams connected.

## Critical communication and collaboration

The Rave suite is purpose-built to enable emergency notifications, critical data sharing, and response coordination.

Enhance emergency preparedness and response, interconnect public, private and 9-1-1 response teams, and provide timely and targeted communications with the full Rave Mobile Safety suite.
