AVIGILON™

Orchestrate integration with Avigilon

Automatically accelerate the flow of information to those who need it, when they need it

An efficient safety and security operation requires every part of the system to work together seamlessly, and integrating physical security technologies into a unified platform can be challenging. Orchestrate simplifies this process with its user-friendly, cloud-based interface. Configure and automate workflows, connecting Avigilon Unity, Alta video and access control software with other Motorola Solutions ecosystem solutions. Enhance efficiency and response times with these intelligent workflows by detecting triggers across installed devices, alerting appropriate teams, and executing proper procedures. Empower teams to manage security operations.

Intelligent video analytics
Detect more objects with expanded object classifications with greater accuracy for faster responses, even in crowded scenes. Improved analytic event generation and appearance search results.

Integrated workflows
Experience real-time holistic creation and view of operations. Rule-based event triage with secure connection across technology.
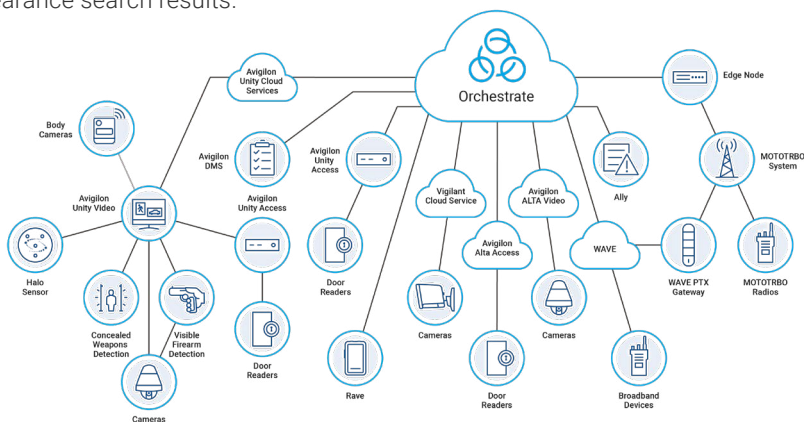

Accelerate operations
Expedite detection & response with reusable, standardized workflows and cross-technology connections.

User-friendly management
Orchestrate is a secure, cloud-based, cross technology platform, users can access and build customized solutions from anywhere, at any time.
